## Microsoft Dynamics GP 2010 - The New Way To Do Business

Looking to upgrade to Microsoft Dynamics GP 2010? There has been significant value added to the latest release, GP 2010, and if you aren't on the most current version, you're not benefitting from the latest innovation available to your business.

This latest release makes it easier for people to make fast, informed decisions using business intelligence that's personalized to their roles and available through familiar Microsoft Office applications. New capabilities continue to streamline and automate business processes, simplify setup and maintenance, and let you tailor your solution to meet specific user and business needs.

With more than 150 enhancements, Microsoft Dynamics GP 2010 offers innovation that enables your people to work with information and processes in ways that are familiar to them-today and into the future.

Receive a 10% discount on a Microsoft Dynamics GP upgrade now through March 31, 2011. For more information, [contact us here](#).

March 9th at 10am PST: [Introduction to Management Reporter for Microsoft Dynamics GP](#)

## Spotlight on Tentrox - Powerful Project Management Software

[Tenrox](#) solutions help you meet the challenges of managing a globally dispersed workforce, the projectization of work and increased regulatory scrutiny. Tenrox makes it easy to enforce your work policies, comply with regulations, embrace proven best practices, assess project health, account for all project cost and revenue, and analyze your resource planning requirements in real-time. You will gain instant visibility, make better decisions, adapt faster to changing business conditions, and execute projects more effectively.

Tenrox Project Workforce Management is an [on-demand](#) modular solution that empowers your project workforce locally, and provides visibility globally. This makes it possible for you to manage your globally dispersed customers, projects and teams regardless of their time zone or physical location, eliminating the spreadsheets and custom-built applications enterprises use to fill the gaps caused by disconnected inadequate systems. Interested in taking it for a test drive? [Sign-up](#) to get a free trial now!
