Quick Way to Check Which Service Pack You Are Using

Service packs are updates to products to resolve a known issue or workaround and update systems to the most current code base. Being on the current code base is important because that's where Microsoft focuses on fixing problems. To check which Service Pack you are using, log into Dynamics GP, go to Help

## Get Ready! Microsoft Dynamics GP 2013 Coming Soon

We're excited about the next release of Dynamics GP 2013 coming later this fall and wanted to share with you our top 3 features of the new product including:

1. Web Access
Provide all of your employees easy access to Microsoft Dynamics GP with the new web client, so they can connect and contribute wherever they are, from their PC or mobile device.

2. Business Analyzer
Equipped with the Business Analyzer dashboard that is now easily accessible over the web, you and your team will be able to quickly track key performance indicators, anticipate opportunities, delegate tasks, or take informed action. The Business Analyzer delivers role-specific insight across your business, so each member of your team can drill down to relevant details, collaborate with others, and take quick action right from their Microsoft Dynamics GP 2013 home page.

3. Improved Purchasing
Boost purchasing productivity and accuracy. Set specific percentage tolerances that simplify your purchasing process, allowing Microsoft Dynamics GP 2013 to enter quantity overages and automatically close purchase orders left open due to quantity shortages.

Overall, the day-to-day functions and processes have been simplified to enhance efficiency and productivity. These enhanced capabilities spread across financial management, asset and inventory management, shipping, and purchasing and receiving, among others. Most importantly, it will aid in driving costs out of your business.

If you have any questions about GP 2013, particularly if you are considering upgrading, contact us here. For a full preview of all the new features coming in Microsoft Dynamics GP 2013, click here.

Management Reporter Training Class - New Date!

This two-day class is ideal for the accountant who has had little formal training in Management Reporter, the new real-time financial reporting application from Microsoft, but is interested in learning more about it. Discover the power and flexibility of reporting trees to present financial results at the responsibility level (i.e. by accounting segment or dimension and combinations thereof). Use report output and distribution

(question mark icon) >> About Microsoft Dynamics GP.

Here are the latest versions:

- GP2010 - 11.00.2044
- GP 10 - 10.0.1841

If you need help or are interested in applying the latest Service Pack for Dynamics GP, contact us.

options including Report Viewer. Topics to be covered include:

- **Designing basic report building blocks** in Report Designer with row definitions, column definitions, and reporting tree definitions.
- **Associating the building blocks** in a variety of report definitions including trial balance reports, income statements, variance reports, balance sheets and consolidation reports.
