## Top 5 Reasons to Upgrade to SL 2011

Microsoft Dynamics SL 2011 raises the bar for productivity, performance, and growth with the familiar user experience your people need; insight to fuel the results your customers want; and new ways for your organization to thrive. Check out these top reasons to upgrade:

- **Get more done in less time** - Give people easy access to the resources they need to stay productive. New activity panes, role-based menus, and quick lists make it easy to prioritize tasks, and enhanced menu search features let you find what you need in just a few clicks.
- **Enhance insight with realtime reporting data** - Gain visibility into key reporting data to help your business thrive. Get over 50 predefined views of data by using Quick Query to filter, customize, or drill back to a Microsoft Dynamics SL screen to view the original transaction; and save your custom views.
- **Make it easier to manage and share information** - You can boost productivity with a single, consolidated view of orders, requests, and customer data; and quickly upload reports directly to a SharePoint site to share with your department.
- **Simplify multi-company activities** - With Microsoft Dynamics SL 2011, you can make entries for multiple companies with ease- without having to close any windows to log in to other companies.
- **Automate even more financial processes** - Get tighter control of your general ledger with robust financial capabilities and complete general ledger tasks quickly and reduce errors with automated support for common actions- from reversing and copying entries to correcting journal batches.

Now's a great time to schedule an upgrade to Microsoft Dynamics SL 2011. Spots are filling up so please contact [Carol Simonson](#) if you would like to learn more or schedule your Microsoft Dynamics SL 2011 upgrade. We can also do an assessment first to see what areas of your infrastructure (client operating system, server operating system, SQL version, etc.) may need to be upgraded first.

## Spotlight on SVA Consulting

[SVA Consulting](#) provides add-on solutions that extend Microsoft Dynamics SL. Their NetProcurement suite functionality helps increase efficiency by automating the process of requisitioning goods from creation to approval. The program can then extend the receipt and

vouchering of products or services remotely, allowing for central control of cash disbursements.

The NetProcurement suite of applications can be used for requisitioning goods, remotely receive products or services against purchase orders, a vouchering add-on for Microsoft Dynamics SL, a routing engine for the NetProcurement Suite tools, and an approval engine for their requisitioning tool. This comprehensive suite includes:

- **NetRequisition** automates the entire workflow of requisitioning goods for purchase through a browser-based requisition creation, submittal and approval system.
- **NetReceipt** extends the power of the NetProcurement Suite to provide the ability to remotely receive product or services against purchase orders.
- **NetVoucher**, a web-based add-on of Microsoft Dynamics SL, features a voucher and adjustment entry screen as well as vendor maintenance.
- **NetMonitor** is the robust, efficient, flexible routing engine that has the sophistication to handle complicated multi-company, multi-database scenarios and can be deployed across multiple servers to scale in high-volume environments.

## SL Tips and Tricks

Check out this month's shortcuts that work in **Microsoft Dynamics SL** and other Microsoft applications:

### August SL Tip:

We all have those days when the process we've run a million times *right*, goes wrong and we aren't quite sure what happened and now you have a check batch stuck in limbo. This is one way to correct it. Go to **AP > Processes > AP Check Update (Post)** and do an **F3 look-up** in the Batch number field. Presto! Your batch is found. Pull it in and if

you didn't print your checks already, you can set the Check Handling to 'Delete' and process. Your batch will magically re-appear in the Check Report Screen (#03.620.00).

### Coffee is on Us!

As a Boyer client, we'd love it if you could provide a "review" of our services and offerings on Microsoft PinPoint. If you had a good experience working with us, we would appreciate it if you'd tell other people about it using [PinPoint's Customer Ratings and Reviews feature](#). You can rate our work and share comments that might be helpful to others looking for an accounting software support provider.

In appreciation, you will receive a [\\$10 Starbucks gift card](#)! To review our service and solutions, [click here](#).
