## Features added and issues fixed in Management Reporter 2012 Cumulative Update 10 (CU10) 2.1.10001.112

Last modified Monday, September 29, 2014

## Features added

Related Suggestions	Feature
	Total formulas are included when reports are downloaded to Microsoft Excel
	Users can choose how headers and footers are exported to Microsoft Excel
	Account category descriptions don't display in drill down
	Customers can choose which Dynamics GP companies to include in the data mart
	Customers can choose to include or exclude AA information when creating Dynamics GP data mart companies
	Data mart integration performance improvements

## Issues fixed

Microsoft Dynamics Bug ID	Title
415065	During data mart Configuration Management Reporter is incorrectly validating the version of SQL
793092	Column Justification setting doesn't export to Excel
906000	The operation could not be completed due to a problem in the data provider framework when Company does not contain a current year
1066769	When configuring a Dynamics AX 2012 Data Mart the next button may not work when multiple integrations are running on the same AX database
1510145	Dynamicx AX totaling account updates aren't reflected in Report Designer
1551909	Missing Account Analysis is timing out
1574869	Poor performance for a very large number of currencies and exchange rates
1587161	Duplicate amounts when same dimension used in row and tree
1602459	CBR calculation shows zero at account level when using rounding in the report definition
1603128	May receive an invalid period warning with consolidated report for Dynamics GP companies that have a short fiscal year
1603137	Confirmed budget encumbrance reporting incorrect amounts for Dynamics AX
1618874	Report Designer closes unexpectedly in Dimensions window when 201+ dimensions lines exist
1620372	Transaction detail descriptions showing for NP Column
1623574	Case difference in Dynamics AX AOS server integration configuration causes UNIQUE KEY constraint 'UC_ControlFolderIntegration_Name_SourceID' error on Hierarchies task

1624065	Base period list does not originate from the Base year shown when Report Definition is
	opened (first year's periods shown) for Dynamics AX companies
1631811	Slow performance during Dynamics AX data mart load when querying the count() on BUDGETPLANchanges
1634637	Documentation: Migration Wizard - Reporting tree additional text is not migrated from FRx
1636205	More than 32,768 units in a Tree causes "The INSERT statement conflicted with the
	CHECK constraint "CK_ReportUnit_Index". The conflict occurred in database
	"ManagementReporter", table "dbo.ReportUnit", column 'Index'.
1636223	Rounding of thousands or greater returns incorrect data (decimal place issue) on a
	CALC column at the Account Detail Level
1636231	NP on DESC column causes error in Web Viewer
1647838	"Dynamics cannot show the selected item" error in web viewer when using the Open in
	Microsoft Dynamics/Drill to Dynamics feature for an encumbrance column with
	Dynamics AX 2012
1650631	Documentation: Management Reporter 2012 CU 9 system requirement doc does not
	specify service pack 2 requirement for Windows Server 2008
1676670	Unique Fiscal Year with Calc Column returning "An unknown error has occurred while
1001174	processing report"
1681174	No warning when admin attempts to connect to existing data mart database and data
1001000	already exists in data base
1681960	Adding a specific dimension to row definition with CU9 causes invalid report data
1683020	Fiscal Years task errors on LoadMatchingFiscalYears with "An item with the same key has already been added"
1687237	
1687237	Integration select queries locking/blocking transactions (inserts) during Dynamics GP
	Integration select queries locking/blocking transactions (inserts) during Dynamics GP data mart load
1687237 1687286	Integration select queries locking/blocking transactions (inserts) during Dynamics GP data mart load Calculation/Total in row will be incorrect when it pulls from two other calculations/totals
	Integration select queries locking/blocking transactions (inserts) during Dynamics GP data mart load
1687286	Integration select queries locking/blocking transactions (inserts) during Dynamics GP data mart load Calculation/Total in row will be incorrect when it pulls from two other calculations/totals below it and tree is being used
1687286	Integration select queries locking/blocking transactions (inserts) during Dynamics GP data mart loadCalculation/Total in row will be incorrect when it pulls from two other calculations/totals below it and tree is being usedDynamics GP data that isn't valid causes duplicate key exception in fiscal year provider
1687286 1689169	Integration select queries locking/blocking transactions (inserts) during Dynamics GP data mart load Calculation/Total in row will be incorrect when it pulls from two other calculations/totals below it and tree is being used Dynamics GP data that isn't valid causes duplicate key exception in fiscal year provider during data load
1687286 1689169 1693183	Integration select queries locking/blocking transactions (inserts) during Dynamics GP data mart load   Calculation/Total in row will be incorrect when it pulls from two other calculations/totals below it and tree is being used   Dynamics GP data that isn't valid causes duplicate key exception in fiscal year provider during data load   Missing transaction drill down details when using Dimension Filter in column
1687286 1689169 1693183 1693194	Integration select queries locking/blocking transactions (inserts) during Dynamics GP data mart loadCalculation/Total in row will be incorrect when it pulls from two other calculations/totals below it and tree is being usedDynamics GP data that isn't valid causes duplicate key exception in fiscal year provider during data loadMissing transaction drill down details when using Dimension Filter in column Range of account on Row isn't returning expected data with the data mart Can't drag and drop report to a different folder in the Report Viewer with CU9 Moving the Management Reporter database to different server causes Decrypt error to
1687286   1689169   1693183   1693194   1693894   1697236	Integration select queries locking/blocking transactions (inserts) during Dynamics GP data mart load Calculation/Total in row will be incorrect when it pulls from two other calculations/totals below it and tree is being used Dynamics GP data that isn't valid causes duplicate key exception in fiscal year provider during data load Missing transaction drill down details when using Dimension Filter in column Range of account on Row isn't returning expected data with the data mart Can't drag and drop report to a different folder in the Report Viewer with CU9 Moving the Management Reporter database to different server causes Decrypt error to occur multiple times every minute
