Making Businesses Better

Dynamics 365 is
'in the cloud' ... So what?

Defining SaaS	Dynamics 365 is Software as a Service (SaaS), which means it runs entirely in the cloud and is accessed via an Internet browser.
No Hardware Costs	• Since the product is run in the cloud, no internal infrastructure is required. • Saves money on equipment purchase. • Eliminates required maintenance, freeing up your IT staff for other tasks.
Known Software Costs	• No large initial software purchase. • No annual maintenance fee. • No upgrade costs.
Subscription-based Model	• Set cost per user per month helps you set your budget with confidence.
Automatic Upgrades	• Skip the pain of time-consuming upgrades. • Upgrades are automatic, fast and easy. • Patches or fixes are too. • Know you're always on the latest version.

Boyer & Associates supports Dynamics 365 Business Central.
