

FEATURES

BENEFITS

Custom Report Design	Use a “building block” approach to design reports. Define the rows and columns that will appear in each report and Reporting Tree to establish the relationship between reporting units.
Familiar Spreadsheet Interface	Create financial statements easily by leveraging a familiar spreadsheet interface and tight integration with the Microsoft Dynamics SL general ledger and database structure.
Top-Level Report Analysis	Achieve superior report analysis by consolidating information from multiple companies and data sources—including unposted transactions or base period referencing—or by creating custom report relationships.
Sophisticated Calculations	Implement mathematics and if/then logic to incorporate complex calculations into your reports.
Report Relationship Customization	Create new reporting relationships by changing the Reporting Tree structure, without affecting data entry processes or rearranging account segments in the general ledger.
Currency Translation Support	Seamlessly translate currency across multiple accounting systems—including functionality for calculating monthly and annual average and historical rates—and quickly set up currency exchange rate tables with information pulled from the general ledger.
Bottom-Level Report Analysis	Analyze information from summary all the way down to transaction details with FRx DrillDown Viewer™.
Multiple Report Formats	View reports on the screen and drill down into underlying data. Print reports for presentations, e-mail them for easy distribution, or export them to spreadsheets for additional analysis.
Web-Based Reports	Publish, store, and manage reports through your Intranet or Internet, yet maintain full drill-down and printing functionality.
Comprehensive Report Books	Organize multiple document types in a single file, including Microsoft FRx reports, Microsoft Office document and Crystal reports.
Custom Security Settings	Set security by Reporting Tree level to ensure information is accessed by only those users that have the right permission settings.
Automate Report Delivery and Production	Use FRx Report Server to automate the production and distribution of reports in a scalable, high-speed reporting environment.
XBRL Support	Create and publish reports that are compliant with Extensible Business Reporting Language (XBRL).
